

innovus®

Decorative Products

- First-class look and feel.
- Made to last – quality made in Germany.
- Products for special requirements – such as Fire X, Hydro X, MDF Superlac and especially for increased durability and impact resistance: Innovus® Impact or Innovus® Ultra Impact.

A brand of
SONAE ARAUCO

Sonae Arauco is one of the world's leading manufacturers of engineered wood solutions. From Innovus® decorative panels to **Core & Technical solutions** and **AGEPAN®**, the company offers a versatile product range that provides added value for furniture projects, interior design and construction.

Sustainability is a central feature of Sonae Arauco's self-image. Some of the company's products are already manufactured using up to 70% recycled wood. Through its commitment to the circular bioeconomy, Sonae Arauco is able to transform wood waste into new products - and thus specifically extend their life cycle.

Why? innovus®

Decorative Products

A brand of
SONAE ARAUCO

Innovus® sample service

We dispatch DIN A4 samples [decorative panels and laminates] within **24 to 72 hours** (up to 5 samples per order).

Also available:
Samples in the formats **40 × 40 cm** and **200 × 60 cm**.

Order tracking

When we receive an order, it is internally identified as project, so that we can get better production and delivery deadlines.

Secure project management

We register each project in our database and we ensure total confidentiality; this helps us to control and manage all the process related steps. We can, if necessary, sign a non-disclosure agreement.

Dealers network

We have a network of **Innovus®** dealers focusing on supporting your project.

Wrap up in style

When the project is completed, we cooperate on photo shooting and promoting the project and all credits in our websites and general communications.

Turning visions into projects

The Specification and contracting department from Sonae Arauco is in charge of promote and provide technical support to all prescribers in order to facilitate the prescription job to architects, interior designers, contracting industries and all the relevant stakeholders in the process. Our job is to support you in a personalized and customized way to facilitate all steps of the project.

Our mission is to be present, since the design stage up to the execution, so that each project is a success.

Design Studio

Use our **Innovus® design studio** for a quick simulation of decors to serve your clients for a first impression and selection.

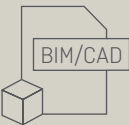

Product portfolio

Benefit from a complete product portfolio, from **Innovus®** decorative panels and laminates, **Core&Technical®** solutions, **AGEPAN®**, as well as offer from our partners in foils, bonded elements and edge banding. The wide range of decors and products, enables architects and planners to realize stylish and modern designs that meet current trends and customer requirements.

Decor image download

Download decor images directly from our website to easily incorporate on renders.

BIM and CAD ready

Archicad and **revit** files are available in **BIMobject** for immediate use. Also you can integrate our data into almost any **CAD** and visualisation software, as we are an **mtextur** partner.

Processing and networking support

We support you directly with the industrial processors and enable networking contacts if necessary.

Your project – our European team

We support you – locally and internationally.

Ecological profile of our products

- Carbon storage that help to reduce CO₂ emissions.
- Efficient products for insulation that reduces energy consumption.
- Made from up to 70% recycled wood and fully recyclable – contributing to the circular economy.
- Strong commitment to the environment: 100% of the wood we use comes from sustainable and controlled sources – including FSC® (FSC® C009049) and PEFC (PEFC/14-35-00013) certified wood.
- Low formaldehyde emissions - several options to fulfil customer requirements and promote healthier indoor air quality
